PROFESSIONAL SUMMARY

Results-driven Software Engineer with professional experience in NestJS microservices and MERN stack development. Proven track record in building scalable backend services and automated delivery systems, complemented by a published research background in AI/ML integration at IEEE ICCCNT 2025. Highly adaptable and detail-oriented, with a commitment to delivering high-quality, efficient code and contributing to innovative development teams.

CORE COMPETENCIES

- Programming Languages: Java, JavaScript, Kotlin, Python, SQL, C++, C, R
- Frameworks & Tools: NestJS (Microservices), MERN Stack (MongoDB, Express, React, Node.js), Android Studio (Kotlin), REST APIs, Git, Jira, Machine Learning APIs
- Other Competencies: Backend/Frontend Development, Database Design, Scalable API Architecture, AI/ML Integration, Version Control & Release Management

WORK EXPERIENCE

Associate Software Engineer – E-W Information Systems (Pvt) Ltd **October 2025 - Present**

- Archdiocese School Management System: Delivered a full-stack web application for private, international, and vested schools, leading business requirement gathering, client meetings, system design, React/Node.js development, deployment, and post-release change requests.
- Developed modules for student management, teacher management, school administration, document management, analytics dashboards, reporting, and role-based access control using React, Node.js, Express, and MySQL.
- Implemented automated PDF generation and WhatsApp document delivery, enabling administrators to generate and securely distribute official documents with minimal manual effort.
- Designed secure document upload workflows, approval processes, bulk operations, filtering, and scalable REST APIs while continuously enhancing system performance and maintainability.
- Chandananda College Management System: Designed and developed a complete school administration platform featuring student onboarding, teacher management, academic records, marks management, and library management, participating from business analysis and client discussions through implementation, deployment, and client support.

Intern - Epic Lanka Pvt. Ltd.

February 2024 - August 2024

- Contributed to the EKYC (Electronic Know Your Customer) suite, including Seylan Admin and Product Admin modules.
 - Collaborated with QA teams to resolve complex bugs in the Digiface web application across both frontend and backend.
 - Optimized database performance by designing and mapping parameters for automated report generation.
 - Managed version releases and maintained technical documentation to ensure project continuity.
-

RESERCH & PROJECTS

Research Project – Project Management Tool (Full Stack Web App with AI/ML Integration)

- Implemented machine learning algorithms for timeline prediction, defect estimation, and task duration forecasting.
- Published and presented the research at the IEEE ICCCNT 2025 conference.
- Recognized as a finalist in the 27th National ICT Awards (NBQSA) 2025.

Easy Reach Store - Shopping Application for Visually Challenged (Android studio - Kotlin)

- Co-developed an accessible shopping application specifically designed for visually challenged users.
- Published findings in the European Chemical Bulletin journal.

Gems and Jewelry Web App (MERN Stack)

- Implemented feedback management using MERN stack.
 - Developed a feedback submission form with star rating, validation, and error handling.
 - Enabled feedback listing and filtering based on user search and timestamp.
-

EDUCATION

Sri Lanka Institute of Information Technology (SLIIT)

Malabe, Sri Lanka

- BSc (Hons) in Information Technology – Software Engineering

2021 - 2025
